

High-protection solutions

In-line Circular joint connectors

Ideal for connections in small spaces and with a high degree of protection (IP68).

Quick, Re-accessible and Compact

Using the fewest number of components, we ensure that the product is installed in an easy way and in the least possible time.

Totally resin and gel-free, our TEETUBE® solutions are re-accessible even after long operating periods.

Availing ourselves of an innovative design and maximum precision in thermoplastic injection, we realize solutions which are considerably compact, with a high number of poles.
