

## ESD bit holder dissipative for 4mm (5/32 inch) hex bits

**Item no.** **6-340-1**  
aluminum handle with ESD coating

### Specification

dissipative  $10^6$  to  $10^9$  ohm  
hex shank with magnet  
for working with 4 mm bits (5/32 inch)  
ergonomically shaped handle  
smooth turning cap with finger recess  
perfectly combinable with torque adapter set (article 4-970-KSB)  
matching accessories extensions with 4 mm shank  
length 80 mm  
weight 15 g

### Application and technology

ESD handle suitable for all work on electrostatically sensitive components or precision repairs such as smartphones (I-Phone, Samsung, HTC). Additionally orderable 36 special safety bits and 6 slot setters, bits with C4 socket. Handle with slim and ergonomic shape, surface resistance  $10^6$  -  $10^9$  ohm (Standard IEC 61340-5-1) the rotatable centering head with finger trough guarantees precision.

Especially for applications in electronics BERNSTEIN, ESD screwdrivers offer solutions for a wide variety of screw heads.
